Index to Titles

Augmented Heat Transfer Tubes, Fouling of, no. 3, p. 57
Boiling Characteristics of Composite Walls, no. 3, p. 66
Buoyancy-Driven Convection, Memoir on, no. 3, p. 19
Density Wave and Pressure Drop Oscillations, An Experimental and Theoretical Study of, no. 3, p. 45
Electronic Packages for Space Applications, Thermal Management of, no. 3, p. 27
Energy Industry Development in the USSR, New Concept of, no. 2, p. 57
Finned Tubes (Comparison of Enhanced and Standard): Field Test of 250-Ton Centrifugal Water Chillers, no. 2, p. 19
Flooded Refrigerant Evaporators with Enhanced Tubes, Performance of, no. 2, p. 29
Fouling Section of the TEMA Standards, Final Report of the HTRI/TEMA Joint Committee to Review the, no. 1, p. 73
Heat Transfer Surfaces (Fouling of): An Historic Review, no. 1, p. 19
Large Power Plant Condensers, Aeration and Deaeration Processes in, no. 4, p. 19
Life with a Risk, no. 2, p. 63
Ohmic Heating, A Note on, no. 4, p. 54
One-Dimensional Fin Solutions, Improvement, no. 1, p. 49
Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) Components, Seawater Test Results of, no. 4, p. 44
Porous-Medium Solar Collector, Analysis of, no. 2, p. 45
Thermodynamic Generalization Methods, Accuracy and Broad Validity of, no. 1, p. 37
Thermodynamic and Transport Properties Evaluation, Generalized, no. 1, p. 60
Water in Rod Bundles, Forced and Combined Convection of, no. 4, p. 32

When It Comes To Heat Exchanger Design...

Time Waits For No Engineer.

If time is critical to you, you need B-JAC's heat exchanger design software. With B-JAC, designs that took hours or days with conventional engineering methods now take minutes.

B-JAC has the only heat exchanger design software that integrates thermal and mechanical design, cost estimation and drawings. You can rapidly look at alternative designs, evaluate them on both performance and cost, and be assured that your designs can be built. On-screen preview drawings are available in seconds and detailed plotter drawings can be produced in minutes.

So, when time moves more quickly than your current system for designing heat exchangers, you need the power of B-JAC software.
